Digital Platform for Corporates

Collaborate. Authenticate. Digitalize

www.dltledgers.com

#dltledgers: Who are we?

We are Asia's leading inter-enterprise platform focused on resolving supply chain issues for Large Enterprises and Banks. We create multi-party private networks that enables digitalization, ecosystem collaboration and authentication, supporting multi party enterprise needs, based on trust, privacy and security.

#dltledgers platform capabilities:

- Digitalize extended multiparty supply chain business networks (suppliers, customers, banks, logistics, ports/customs, certifying bodies, etc.)
- Modular collaborative framework for improving cross-functional efficiencies and external ecosystem interactional efficacy
- Sector neutral solution/offerings
- Low-code platform with enterprise grade security
- On-platform authentication framework
- Open solution with ease of integration and quick deployment

What we do?

#dltledgers

A corporate's private digital network to collaborate, authenticate and digitalise with their ecosystem partners

#dltledgers platform adds multiple functional capabilities to your digital private network via the many apps that can be deployed in a multi-party environment with ease of collaboration and authentication in blockchain .

#dltledgers Platform : Private, permissioned network of the Corporate & their ecosystem partners

#ditledgers: problems we solve for the corporates

Platform enables businesses to collaborate more quickly, efficiently, securely, and transparently

BUSINESS SCENARIO

1. Organizations are facing disruptions in their supply chain execution processes.
2. Organisations are moving digital with higher automation for greater visibility
3. Supply chain execution process is a complex process covering multiple organization

BUSINESS CHALLENGES

1. Supply chain resiliency in multi-party process is becoming a critical business requirement
2. The lack of visibility in the supply chain process leads to inefficient supply chain
3. Collaboration issues and inability to enforce efficient risk-free contracts

Value Proposition

#dltledgers

Value proposition for corporates

Global leader in delivering software tools and solutions for enterprises to digitise their trade processes and supply chain networks

Increase Operational Efficiency

- Digitalisation enabling process efficiencies in internal and external business processes
- Faster Execution and fulfilment with authentication in real-time for data/documents
- Future framework for improving operational efficiency in a multi-party environment

Improve Financial Performance

- Cost saving by reducing paper-based transactions with digital repository
- Smoothen and streamline the working capital process through digital connectivity with multiple banks
- Leverage existing IT investments

Strengthen Risk Management

- Supply Chain resilience with value stream visibility
- Enhanced transparency and control on supply chain digital assets
- ESG and Sustainability data facilitation for reporting and compliance

Enhance Partner Experience

- Build greater digital intimacy and collaboration with strategic customers and suppliers
- Reduce disputes with auto-matching and auto-reconciliation
- Foundational digital network for expanding usecases

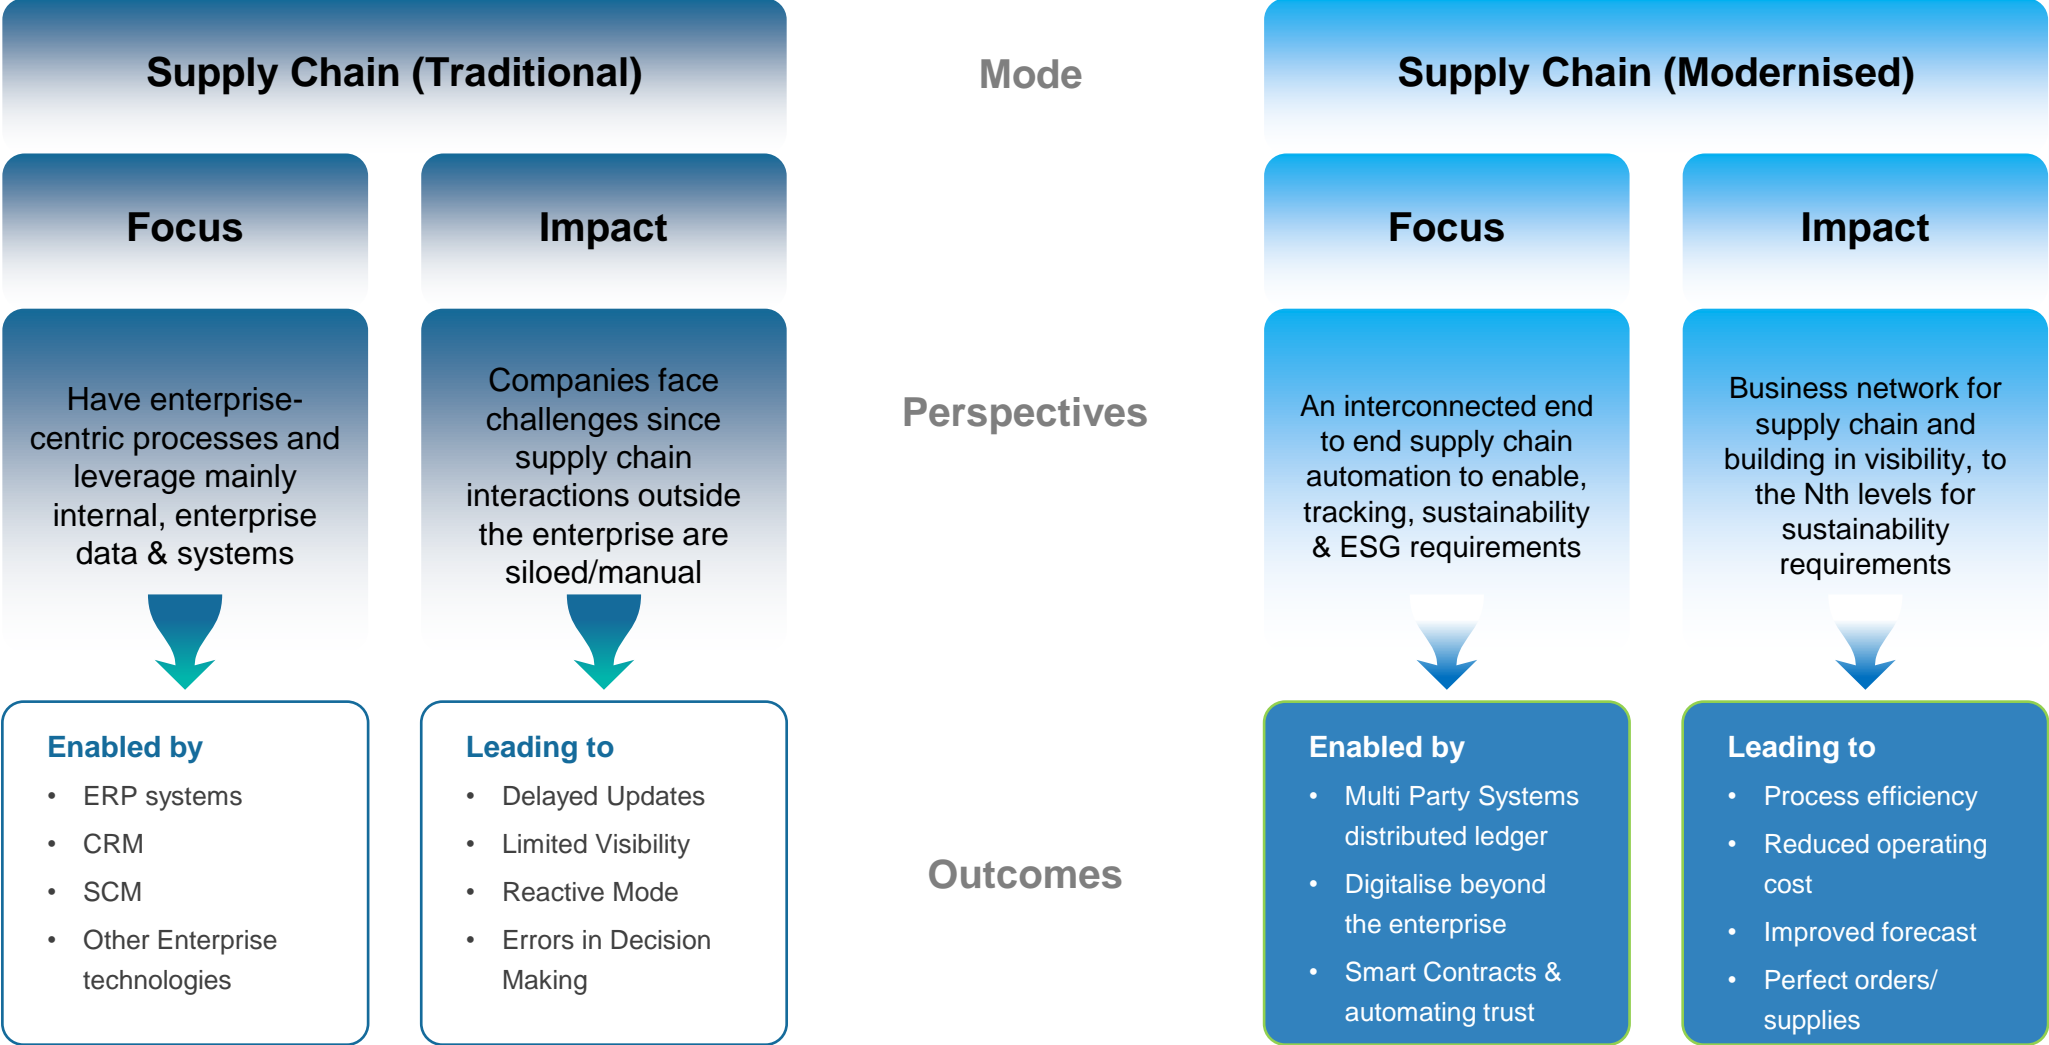

Products/Services

#dltledgers

What is changing in Supply Chain?

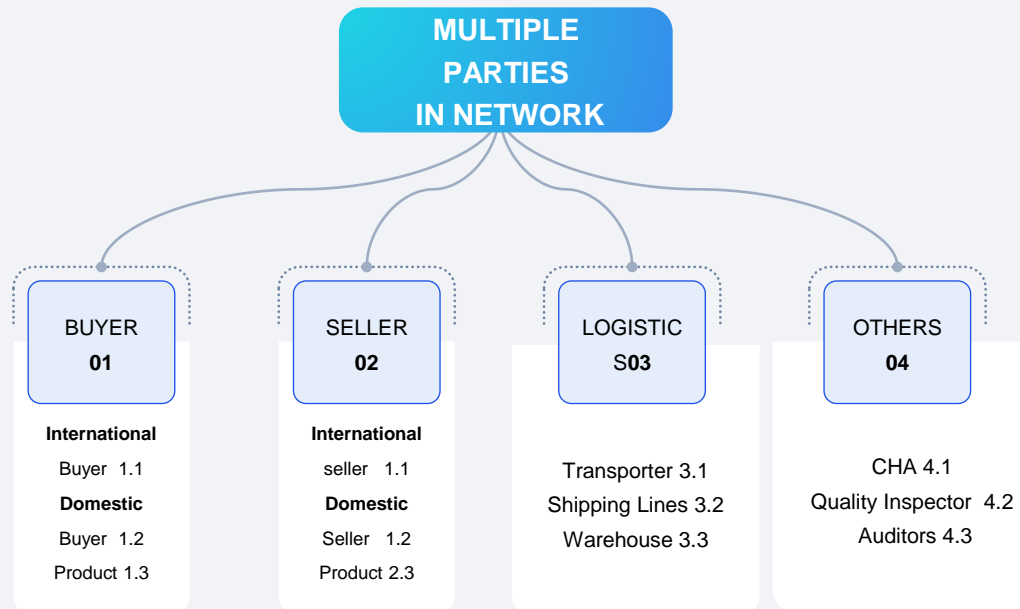

Creating supply chain resilience through inter-connected digital networks

Digital inter-connected network and its applications

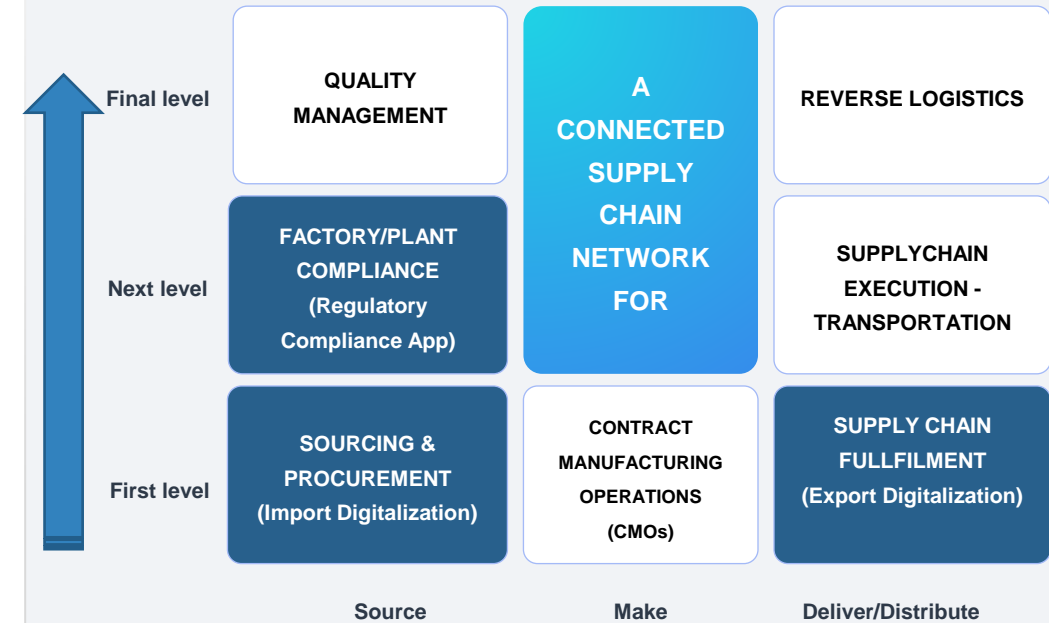

MULTIPARTY NETWORK

- A network of your supply chain actors is created as a network on a distributed ledger
- Data and document transactions between you and these parties are digitalized using this network
- The guard rail is without a “multiparty environment” there is no need to set up the blockchain network

BLOCKCHAIN APPLICATIONS

- To streamline supply chain process and to make it inter-connected supply chain applications are created
- An interconnected supply chain cuts across different supply chain challenges and applications can be activated based on business priorities

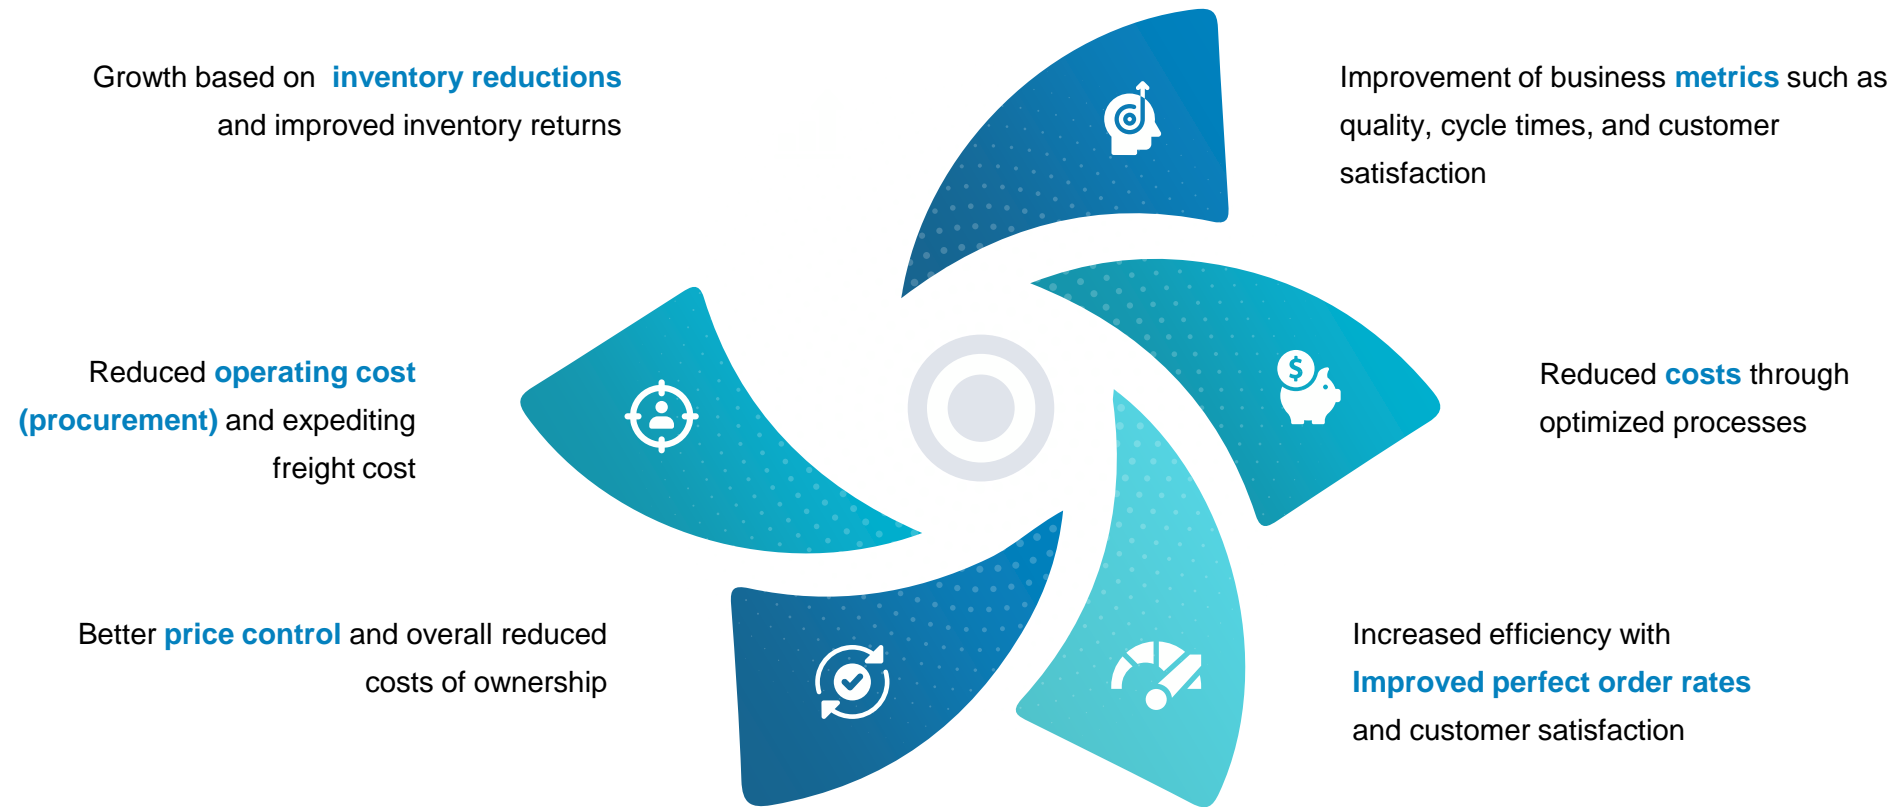

Platform & future offerings

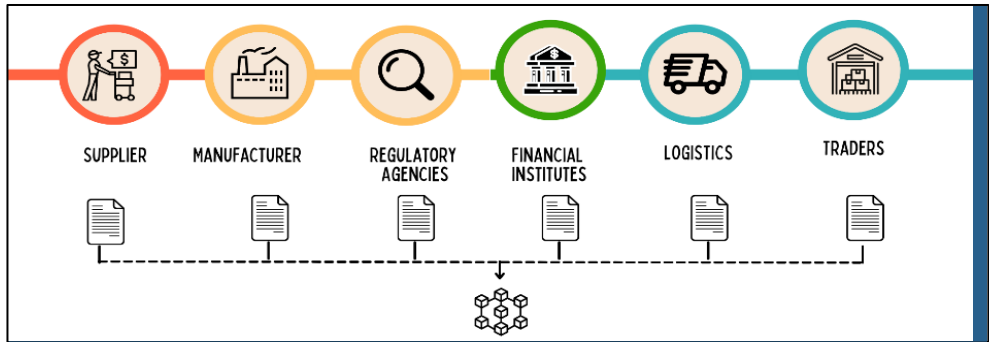

Multi Enterprise Supply Chain Business Network

Enabling better decision making

#ditledgers low code platform – quick deployment

Helps expedite customer journey towards “Digitalisation, Collaboration & Authentication” of multi-party transactions

1. Digitalization modules

3. Authentication modules

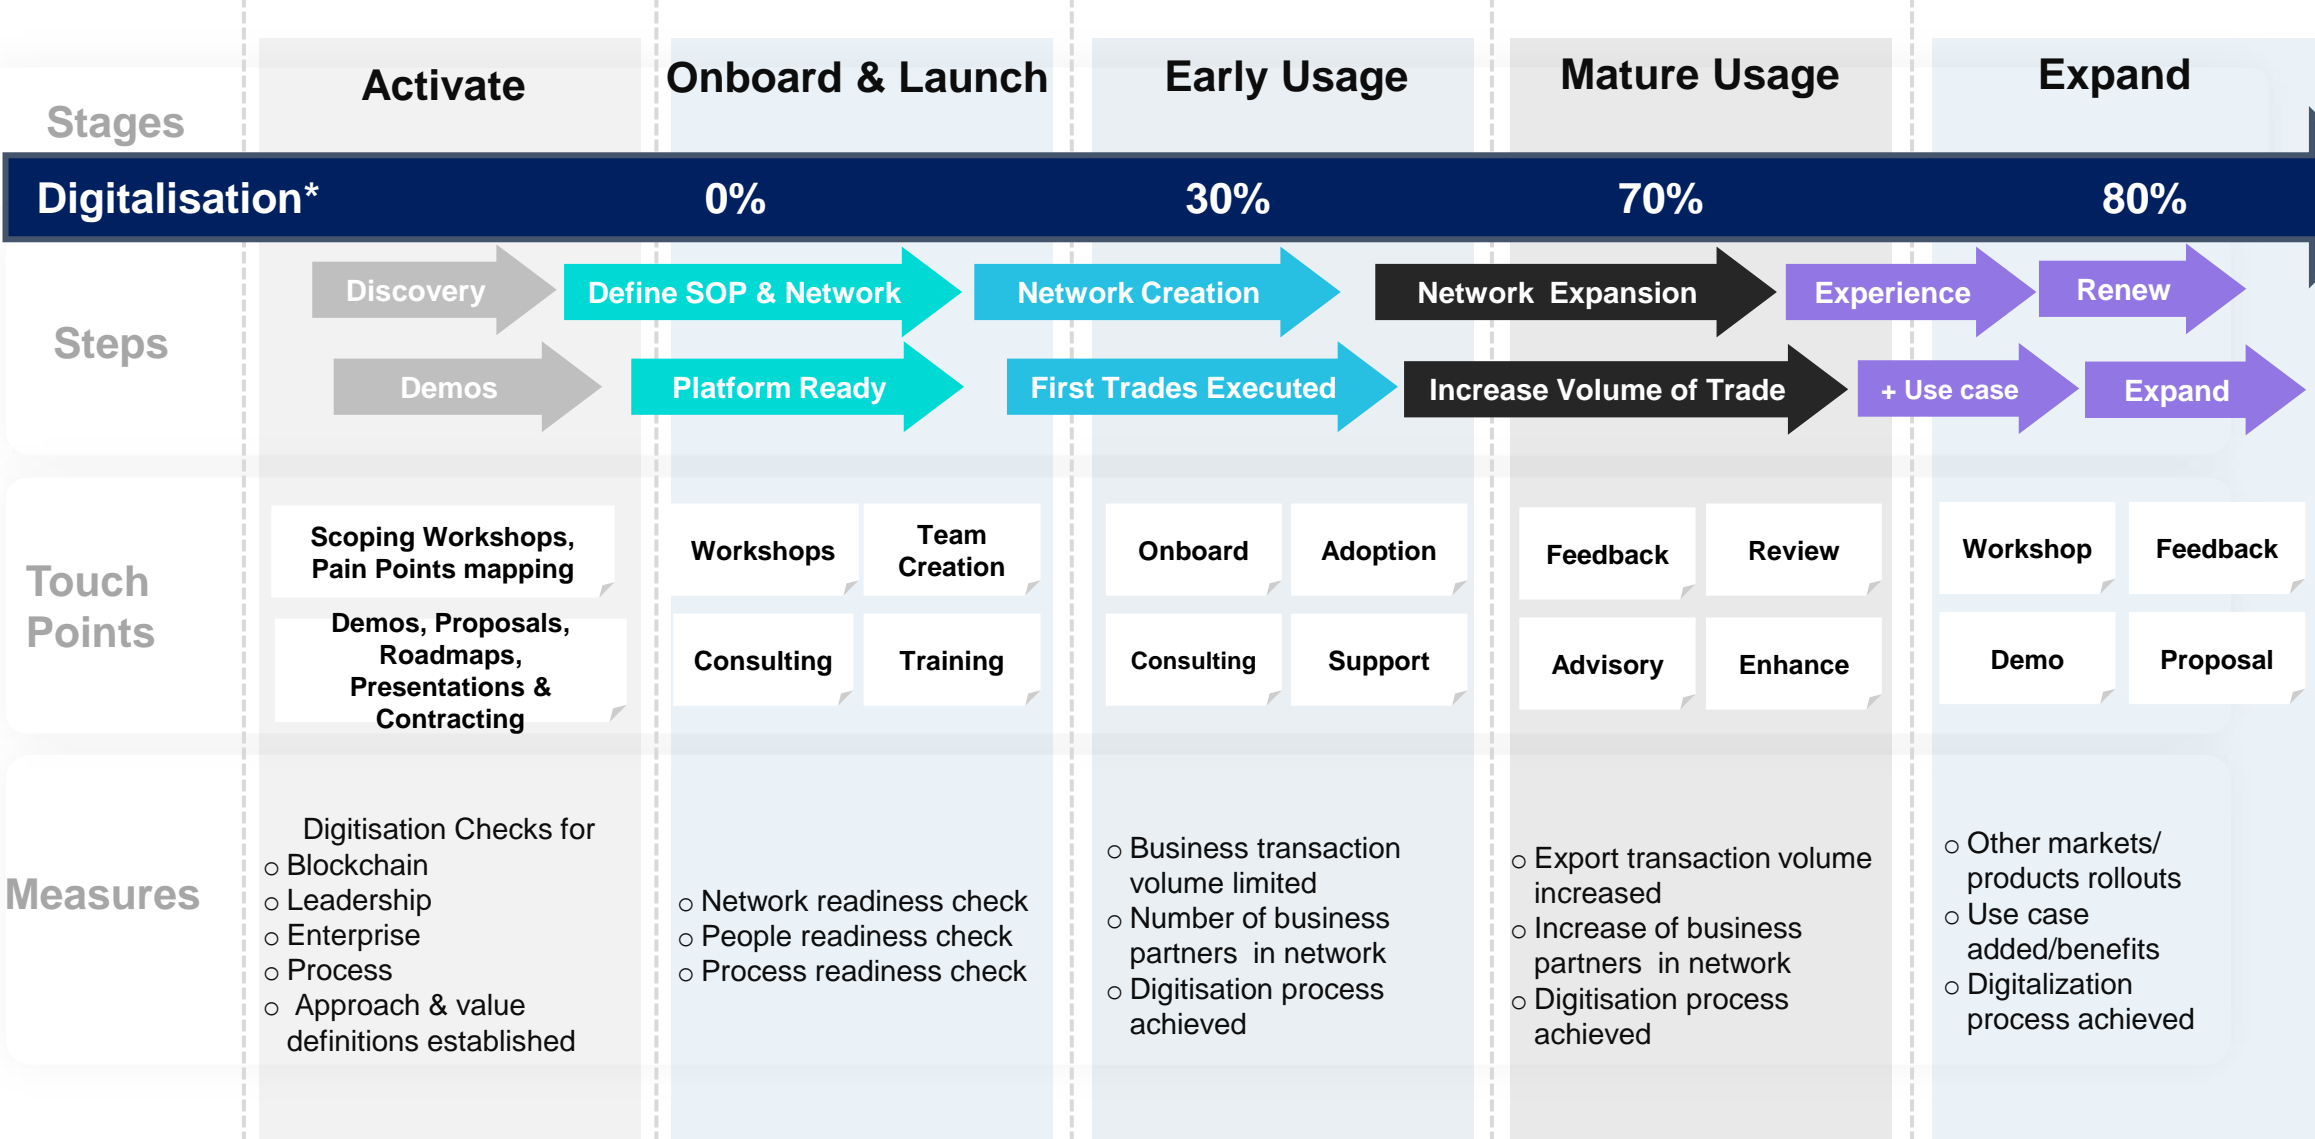

2. Collaboration modules
